

PERSONAL SKILLS INVENTORY

Skills Developed	Challenge	Action taken	Results	Self-reflection/ Key takeaway
Adaptability (e.g challenge faced in an internship; situation where you handled a lot of pressure; time you failed)	When I went for internship with 4-5 peers for the very first time I didn't know what to do,how to do anything.	Then I took the challenge,calmed myself and decided to manage everything.	But I failed in completing the task which was given to me on Day 1.	I realized that to achieve something you have to give your best. So I decided to do more hard work, learn everything properly to succeed.
Analytical (e.g project where you had to perform detailed research and analysis)	When I completed 12th standard, I was perplexed that what to do after 12th, which course would be good which field is good for both being financially stable as well as to gain knowledge.	Then I did some research on internet also talked to some of my cousins who were pursuing their degrees and thinking of my interest in IT sector I decided to do BE from CS.	I spent my time in gaining knowledge of IT sector daily, thought of doing different courses to boost up my knowledge.	I was not sure in starting period that whether I did right or wrong. But as time passed I realized that decision was right and I felt comfortable in that environment.
Communication (e.g convince someone of your idea, present complex information, get your point across)	I wanted a laptop to learn course from Edyoda but my parents were not agreeing to buy me a new laptop.	Then I calmly talked to them, explained them that laptop is right now necessity for me. I also told them about features of laptop and the benefit of doing this course.	they thought of it for sometime and agreed to buy me a new laptop.	If I hadn't been calm then I wouldn't have got a laptop,couldn't have taken classes and gained knowledge. If I would have been arrogant and demanded for laptop straight away they I also would have hurted my parents.
Initiative (e.g stepped up to a challenge, identified a problem and took action to solve it, did something	When I was doing internship me along with my team got a great task to do within 24 hours.	I decided that we all will do team work and will be able to manage this.	fortunately we completed that task within 14 hours.	If I wouldn't have made this task clear to my team and divided them into groups then completing this task within given time limit was next to impossible.

Course Material

PERSONAL SKILLS INVENTORY

even though not your responsibility)				
Skills Developed	Challenge	Action taken	Results	Self-reflection/ Key takeaway
Leadership (e.g coordinated several people to achieve a goal, led a group but not successful)	We had to organize a fest in college and no one was ready to volunteer for it from my class.	I came forward and took the responsibility of organizing a fest and seeing this some more peers joined me.	That fest was better than all other departments and we received good feedback.	If I wouldn't have stepped forward to organize this fest then maybe it wouldn't have been organized at all.
Planning & Organization (e.g overcame a tight timeline, handled multiple responsibilities, manage your time and prioritize tasks)	We had to organize a fest in college and no one was ready to volunteer for it from my class.	I came forward and took the responsibility of organizing a fest and seeing this some more peers joined me.I took the responsibility of organizing a fest and I had so many task so I divided my class in groups.	That fest was better than all other departments and we received good feedback.	If I wouldn't have stepped forward to organize this fest then maybe it wouldn't have been organized at all.
Problem-solving skills (e.g talk about a problem/obstacles faced to reach a goal and how you solved it)	During lockdown we all became so habitual of our mobile phones that I couldn't concentrate on my study for long duration.	I muted all my notifications, fixed my schedule and kept a short term goal to achieve within a day.	Within 21 days my routine was fixed and I was no longer distracted by my mobile phone and improved my result.	I learnt self control,did a lot of thinking and made myself understand the disadvantages of using mobile all time and ignoring studies. If I wouldn't have controlled myself at that time then I would have ruined my future.

PERSONAL SKILLS INVENTORY

Teamwork (e.g when you worked on a team to achieve a goal; conflict faced when working on a team; working with a team member not cooperative)	We had to fill 1500 forms digitally when we were doing internship.	We divided the amount of data between all to ease the load and avoid data redundancy.	We were able to fill those forms within 4 hours.	If we wouldn't have divided this work properly then we wouldn't have been able to complete this bulky task in such short time.
